We Want to Be a Partner in EPA's National Partnership for Environmental Priorities

IDENTIFYING INFORMATION

Name of Organization: Aetna Insulated Wire Inc
Principal Contact: Dawn Zhao
Authorizing Official: Rick Williamson
Address: 1537 Air Rail Ave
Phone/Fax: (757) 460-3381
EPA RCRA ID Number: VAD988189767

Facility Name: _____
Title: Supervisor, Design & Development Engineering
Title: Director of Engineering
City/State/Zip: Virginia Beach, VA 23455
Email: DZHAO@aetnawire.com
Date: September 18, 2007

PARTNER AGREEMENT

Our organization is choosing to become a partner in EPA's National Partnership for Environmental Priorities. Our goal is to reduce the quantity of one or more Priority Chemicals currently found in our products, processes, or releases using techniques such as source reduction, recycling, or other materials management practices. In this enrollment application, we identify one or more voluntary goals that we believe we can achieve as partners in this program. The voluntary goal(s) provided below is an initial estimate and may change over time. We may revise our goal(s) or withdraw from the program at any time. If/when we choose to revise our goals or withdraw from the program, we will notify EPA.

GOAL #1. Chemical Name: Lead **CASRN:** 7439-92-1

Narrative description of proposed project: Aetna Insulated Wire is developing a lead reduction plan for its wire and cable production. We use polyvinyl chloride (PVC) as the insulation and protective covering material of some of our products. One of the primary heat stabilizers used in PVC compounds is lead. Our goal is to offer lead-free PVC alternatives to customers through the use of flexible vinyl formulations that contain heat stabilizers other than lead.

How we will measure success: We will measure success by comparing the annual purchase of lead compounds between the start and end dates of our goal.

1a. Our voluntary **source reduction** goal for Chemical #1 is to reduce the amount of this chemical generated/used from a baseline amount of 135,800 pounds in December, 2006 (month/year) to a reduced amount of 108,000 pounds generated/used by December, 2007 (month/year).

1b. To accomplish this goal, we will use the following source reduction options (check all that apply):

<input type="checkbox"/> Equipment or technology modifications.	<input type="checkbox"/> Process or procedure modifications.
<input type="checkbox"/> Reformulation or redesign of products.	<input checked="" type="checkbox"/> Substitution of less toxic raw materials.
<input type="checkbox"/> Improvements in inventory control.	<input type="checkbox"/> Improvements in maintenance/housekeeping practices.
<input type="checkbox"/> Other (describe): _____	

2a. In addition to, or in lieu of using source reduction methods, our voluntary **recycling or recovery** goal for Chemical #1 is to increase the recycled or recovered quantity of this chemical from a baseline amount of _____ pounds in _____ (month/year) to an increased quantity of _____ pounds by _____ (month/year).

2b. To accomplish this recycling or recovery goal, we will use the following options (check all that apply):

<input type="checkbox"/> Direct use/reuse in a process to make a product.
<input type="checkbox"/> Processing the waste to recover or regenerate a usable product.
<input type="checkbox"/> Using/reusing waste as a substitute for a commercial product.
<input type="checkbox"/> Other (describe): _____

3. We have a Quality Assurance/Quality Control Plan for data (check which applies). ☒ Yes ☐ No
